

Dear Broadway ELC Families,

We are so glad you are here! Broadway ELC is a very special place for your child to learn and grow!

Broadway Early Learning Center Mission

Broadway Early Learning Center supports the development of young children through high quality instruction, services, and partnerships with families and community organizations. Our goal is to guide the development of skills and behaviors necessary for success in school, and in life, while providing developmentally appropriate opportunities through an enriching and caring environment based on individual needs.

Whether your child has been through Progress Center in the birth through 3 years of age early intervention program, or you are concerned about the development of your child currently ages 3-5, we are here to serve you and your family!

Broadway Early Learning Center Services

Broadway serves students who qualify for Specially Designed Instruction (SDI) using standardized early childhood assessments for ages 3-5 based on Washington Administrative Code (WAC) and Federal guidelines. Children qualify in at least one of five areas: cognitive (pre-academic), communication, social/emotional, gross motor, and adaptive skills (dressing, self-feeding, transitions, etc.)

Please call us with any questions or comments. We look forward to partnering with you to serve your child!

Wishing you Well.,

Principal, Megan M. Shea-Bates
